## PROJECTS

### Parade Web App

This is a full stack app which provides valuable information about the students' classroom progress and allows teachers and parents to directly communicate with one another, all in the preferred language of each user.

Java • HTML • CSS • Flexbox • CSS Grid • Modern Javascript • TDD • Spring • Spring Boot • Agile(Scrum) • AJAX • Promise • JSON

### Artists-Albums-Songs Collection

This is a full stack web app where we built our own API for users to view Artists, albums and songs collection. Users also can update and create an artist, album and song.

Java • HTML • CSS • Flexbox • CSS Grid • JSON • Modern Javascript • TDD • Spring • Spring Boot • Agile(Scrum) • AJAX • Promise

### Cookie Clicker Calamity

Built a browser game where users click on a cookie and it shows their clicks. Users also can purchase a companion to click the cookie for them at a cost. Users also can multiply their clicks at a cost to increase their click count.

HTML • CSS • Flexbox • CSS Grid • Modern Javascript • TDD in Jasmine

### Review Site for Wines

Developed a Dynamic web application with a MVC architecture where users can select a category of wines and write reviews on it.

Agile Methodology • Java OOP • TDD • HTML • CSS • Spring MVC • Thymeleaf • Spring Boot

### Virtual Pet/Alien

Created an interactive user interface where users can create organic or cyborg aliens(pets). Players can take actions such as feed, work, or get smart on a single or all aliens.

Agile Methodology • Java OOP(Abstraction, Polymorphism, Inheritance and Encapsulation) • Junit TDD
